Dear Sir,

I have already been granted my petition to make special for my cordless stethoscope for use in hazardous material environments Application # 10/644111.

I have recently been diagnosed with prostate cancer and I am again petitioning to have my application made special due to an additional medical reasons. Since the application's progress seems to have slowed, I felt that an additional reason to make special might help move things along a bit faster.

Thank You,

Keith Sauerland
